What is more, the passing rate of our MB-800 study materials is the highest in the market.

NEW QUESTION: 1
You are building a dataset from a JSON file that contains an array of documents.
You need to import attributes as columns from all the documents in the JSON file. The solution must ensure that date attributes can be used as date hierarchies in Microsoft Power BI reports.
Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Answer:
Explanation:

Explanation

Step 1: Expand the records.
First Open Power BI desktop and navigate to Power Query, import the JSON file, then load the data, click on the record to expand it and to see the record and list.
Step 2: Add columns that use data type conversions.
Step 3: Convert the list to a table

NEW QUESTION: 2
A customer comes to you stating that his hard drive has crashed. He had backed up the hard drive, but some files on it were encrypted with Windows Encrypted File System (EFS). What do you need to do to be able to give him access to those restored encrypted files?
A. Nothing, when you restore, he will have access.
B. You need the encryption key. If that was not saved/backed up, then there is no chance of recovery.
C. Nothing, they are unrecoverable.
D. You need to make sure that when you restore, you give the new machine the same user account so that he can open the encrypted files.
Answer: B
