NEW QUESTION: 3

You have a DHCP server named Server1.

Server1 has an IPv4 scope that serves 75 client computers that run Windows 10.

When you review the address leases in the DHCP console, you discover several leases for devices that you do not recognize. You need to ensure that only the 75 Windows 10 computers can obtain a lease from the scope.

What should you do?

- A. Create and enable a DHCP filter.
- B. Run the Add-DhcpServer4ExclusionRange cmdlet.
- C. Create a DHCP policy for the scope.
- D. Run the Add-DhcpServer4OptionDefinition cmdlet.

Answer: C

NEW QUESTION: 4

- A. DOM
- B. Parent
- C. String
- D. Window
- E. JavaScript
- F. JSON

Answer: C, E, F

Explanation:

Explanation

* Example:

```
var myHelloWorker = new Worker('helloworkers.js');
```

You'll then start the worker (and thus a thread under Windows) by sending it a first message:

```
myHelloWorker.postMessage();
```

Indeed, the Web Workers and the main page are communicating via messages. Those messages can be formed with normal strings or JSON objects.

* (E) The Web Workers API makes it possible to execute a

JavaScript file asynchronously and autonomously.
A web worker is essentially a thread executing a JavaScript file.

* (A, D) In the first implementations of web workers the browsers only allowed strings to be exchanged as messages. However, recent implementations allow for exchange of values or JSON objects.
