Most of the AD0-E315 practice guide is written by the famous experts in the field.

NEW QUESTION: 1
Your network contains an Active Directory domain named contoso.com. The domain contains domain controllers that run either Windows Server 2003, Windows Server 2008 R2, or Windows Server 2012 R2.
You plan to implement a new Active Directory forest. The new forest will be used for testing and will be isolated from the production network.
In the test network, you deploy a server named Server1 that runs Windows Server 2012 R2.
You need to configure Server1 as a new domain controller in a new forest named contoso.test.
The solution must meet the following.

Select two options below.
A. Set Forest Functional Level to Windows 2003.
B. Set Domain Functional Level to Windows 2012.
C. Set Forest Functional Level to Windows 2012.
D. Set Forest Functional Level to Windows 2008 R2.
E. Set Domain Functional Level to Windows 2003.
F. There is no need to set the Domain Functional Level.
G. There is no need to set the Forest Functional Level.
H. Set Domain Functional Level to Windows 2008 R2.
I. Set Domain Functional Level to Windows 2008
J. Set Forest Functional Level to Windows 2008
Answer: A,F,I
Explanation:
REWORDED Very smartly reworded that you need to configure
server 1 as new DC in a new forest named contoso.test and "also
do name resolution". In the answer you will have to select
Windows 2003 as domain and forest functional level and you
should also check "Domain name system(DNS) server.... This is
not in any dumps
* When you deploy AD DS, set the domain and forest functional
levels to the highest value that your environment can support.
This way, you can use as many AD DS features as possible. For
example, if you are sure that you will never add domain
controllers that run Windows Server 2003 to the domain or
forest, select the Windows Server 2008 functional level during
the deployment process. However, if you might retain or add
domain controllers that run Windows Server 2003, select the
Windows Server 2003 functional level. When you deploy a new
forest, you are prompted to set the forest functional level and
then set the domain functional level. You cannot set the domain
functional level to a value that is lower than the forest
functional level.
