NEW QUESTION: 1

Which of the following materials is least affected by brittle fracture?

- A. Carbon steel
- B. Chromes
- C. All stainless steels
- D. 300 series stainless steel
- E. 400 series stainless steel

Answer: D

NEW QUESTION: 2

Which of these is NOT recommended in the Android Developer's Guide as a method of creating an individual View?

- A. Create it by extending the android.view.View class
- B. Create it by extending already existing View classes such as Button or TextView
- C. Create it by combining multiple Views
- D. Create it by copying the source of an already existing View class such as Button or TextView

Answer: D

NEW QUESTION: 3

Automate the localization of the app. The app interface must be available in English, Spanish, and French. The app uses XAML for localization. The app uses the ResourceLoader class to retrieve localized strings from the code. The app uses the x:Uid property for all of the controls that require localization. The app uses the x:id property for all of the controls that require localization. The app uses the ResourceManager class to retrieve localized strings from the code.

- A. In a subfolder of the app, create three .config files.
- B. In a subfolder of the app, create three .resw files.
- C. Use the ResourceLoader class to retrieve localized strings from the code.
- D. Use the x:Uid property for all of the controls that require localization.

Answer: D

NEW QUESTION: 4

You need to recommend a solution to comply with the language requirements of the app. What should you include in the recommendation? (Each correct answer presents part of the solution. Choose three.)

Answer: B,C,D

Explanation:

From scenario: The app interface must be available in English, Spanish, and French.

A (not C): You can load string resources from objects such as resource files, libraries, controls, and Windows Store app packages and manifests.

* Example: var res =

```
Windows.ApplicationModel.ResourceLoader('Errors');
res.GetString('AlreadyRegistered');
```

D (not E): x:Uid directive Provides a unique identifier for markup elements. For Windows Runtime XAML, this unique identifier is used by XAML localization processes and tools, such as using resources from a .resw resource file. F (not B): Windows Store apps that use XAML For Windows Store apps that use XAML, you localize these fields in resources.resw files by using the Resource Editor. To create the United States English version of the manifest fields, you would add an en-us\resources.resw file.
