NEW QUESTION: 3

A user is displaying the CPU utilization, and Network in and Network out CloudWatch metrics data of a single instance on the same graph. The graph uses one Y-axis for CPU utilization and Network in and another Y-axis for Network out. Since Network in is too high, the CPU utilization data is not visible clearly on graph to the user. How can the data be viewed better on the same graph?

- A. It is not possible to show multiple metrics with the different units on the same graph
- B. Change the axis of Network by using the Switch command from the graph
- C. Add a third Y-axis with the console to show all the data in proportion
- D. Change the units of CPU utilization so it can be shown in proportion with Network

Answer: B

Explanation:

Explanation

Amazon CloudWatch provides the functionality to graph the metric data generated either by the AWS services or the custom metric to make it easier for the user to analyze. It is possible to show the multiple metrics with different units on the same graph. If the graph is not plotted properly due to a difference in the unit data over two metrics, the user can change the Y-axis of one of the graph by selecting that graph and clicking on the Switch option.
