Answer: B

NEW QUESTION: 2

What are the following OMU Portal features that are not part of the VCN3000?

- A. Restart the PCG service
- B. Export the OMU module debug log
- C. View device performance, statistics device online rate
- D. Stop PCG business

Answer: C

NEW QUESTION: 3

You work as a Database Administrator (DBA) for a company named ABC.com.

The company uses a Microsoft SQL Server 2012 infrastructure. You are configuring a highly-available database solution using an AlwaysOn availability group on two servers running SQL Server 2012.

The two servers are in separate datacenters.

The two datacenters are connected by a fast WAN link with a network latency of less than 10ms.

Which of the following failover types should you configure for the availability group?

- A. You should configure the synchronous automatic failover failover type.
- B. You should configure the Asynchronous automatic failover failover type.
- C. You should configure the synchronous manual failover failover type.
- D. You should configure the asynchronous manual failover failover type.

Answer: A

NEW QUESTION: 4

You are debugging an application that calculates loan interest. The application includes the following code.

(Line numbers are included for reference only.)

You have the following requirements:

The debugger must break execution within the CalculateInterest() method when the loanAmount

variable is less than or equal to zero.

The release version of the code must not be impacted by any

changes.

You need to meet the requirements.

What should you do?

A. Insert the following code segment at line 05:

```
Trace.Write(loanAmount > 0);
```

B. Insert the following code segment at line 03:

```
Trace.Assert(loanAmount > 0);
```

C. Insert the following code segment at line 05:

```
Debug.Write(loanAmount > 0);
```

D. Insert the following code segment at line 03:

```
Debug.Assert(loanAmount > 0);
```

Answer: D

Explanation:

Explanation/Reference:

Explanation:

By default, the Debug.Assert method works only in debug builds. Use the Trace.Assert method if you want to do assertions in release builds. For more information, see [Assertions in Managed Code](#).
