High quality practice materials like our 050-702-IGLASC02 learning dumps exert influential effects which are obvious and everlasting during your preparation, So your error can be corrected quickly.

We promise you here that as long as you pay more attention on points on the RSA 050-702-IGLASC02 valid practice file, you can absolutely pass the test as easy as our other clients.

Besides, you can print the 050-702-IGLASC02 study torrent into papers, which can give a best way to remember the questions, The exam prepare materials of Samrock is high quality and high

pass rate, it is completed by our experts who have a good understanding of real 050-702-IGLASC02 exam and have many years of experience writing study materials.

050-702-IGLASC02 certificate is the dream certificate of many people, With our trusted service, our 050-702-IGLASC02 study guide will never make you disappointed, After continuous improvement for years, 050-702-IGLASC02 test questions have built a complete set of quality service system.

050-702-IGLASC02 Valid Test Blueprint - 100% Authoritative Questions Pool

The top vendors we are working with today include Cisco, Microsoft, [050-702-IGLASC02](#) Adobe, IBM, Brocade, Apple, CompTIA, Oracle, RSA, EMC, and several more, There is no problem to make your dream come true.

With this certification, you will get international recognition [ADFA Vce Format](#) and acceptance, There is no doubt that it is very difficult for most people to pass the exam and have the certification easily.

If you have any doubt about our 050-702-IGLASC02 pass dumps, welcome you to contact us via on-line system or email address, So our 050-702-IGLASC02 updated cram can help you get out of a rut and give full play to your talents in your 050-702-IGLASC02 latest questions and future career.

And the different discount will send to you in the festival if you want to buy 050-702-IGLASC02 actual exam dumps, After you install the new version of the 050-702-IGLASC02 pass-for-sure file, you will find the operation is much better and the whole layout becomes beautifully.

Our 050-702-IGLASC02 exam torrent materials are specially designed to ensure you 100% pass rate and get the certification successfully, Samrock competition is laden with RSA Other Certification dumps and fake RSA Other Certification **Valid 050-702-IGLASC02 Test Blueprint** questions with rotten RSA Other Certification answers designed to make you spend more money on other products.

Quality is a very important element when people try to buy 050-702-IGLASC02 test braindumps.

NEW QUESTION: 1

CORRECT TEXT

You are the network security engineer for the Secure-X network. The company has recently detected Increase of traffic to malware Infected destinations. The Chief Security Officer deduced that some PCs in the internal networks are infected with malware and communicate with malware infected destinations.

The CSO has tasked you with enable Botnet traffic filter on the

Cisco ASA to detect and deny further connection attempts from infected PCs to malware destinations. You are also required to test your configurations by initiating connections through the Cisco ASA and then display and observe the Real-Time Log Viewer in ASDM.

To successfully complete this activity, you must perform the following tasks:

- * Download the dynamic database and enable use of it.
- * Enable the ASA to download of the dynamic database
- * Enable the ASA to download of the dynamic database.
- * Enable DNS snooping for existing DNS inspection service policy rules..
- * Enable Botnet Traffic Filter classification on the outside interface for All Traffic.
- * Configure the Botnet Traffic Filter to drop blacklisted traffic on the outside interface. Use the default Threat Level settings NOTE: The database files are stored in running memory; they are not stored in flash memory.

NOTE: DNS is enabled on the inside interface and set to the HQ-SRV (10.10.3.20).

NOTE: Not all ASDM screens are active for this exercise.

- * Verify that the ASA indeed drops traffic to blacklisted destinations by doing the following:
 - * From the Employee PC, navigate to <http://www.google.com> to make sure that access to the Internet is working.
 - * From the Employee PC, navigate to <http://bot-sparta.no-ip.org>. This destination is classified as malware destination by the Cisco SIO database.
 - * From the Employee PC, navigate to <http://superzarabotok-gid.ru/>. This destination is classified as malware destination by the Cisco SIO database.
 - * From Admin PC, launch ASDM to display and observe the Real-Time Log Viewer.

You have completed this exercise when you have configured and successfully tested Botnet traffic filter on the Cisco ASA.

Answer :

Explanation:

See the explanation for detailed answer to this sim question.

Explanation:

First, click on both boxes on the Botnet Database as shown below and hit apply:

Click Yes to send the commands when prompted.

Then, click on the box on the DNS Snooping page as shown below and hit apply:

Click Yes to send the commands when prompted.

Then, click on the box on the Traffic Settings tab as shown:

At which point this pop-up box will appear when you click on

the Add button:

Click OK. Then Apply. Then Send when prompted.
Then verify that all is working according to the instructions given in the question.

NEW QUESTION: 2

- A. Option C
- B. Option D
- C. Option A
- D. Option B

Answer: A

NEW QUESTION: 3

A user updates a number field on a record from the value of 1 to 2, and a workflow rule executes, incrementing the value to 3. Which statement is true regarding writing triggers in this case? Choose 2 answers

- A. Workflow rules will execute before triggers.
- B. Triggers will execute before and after workflow rules.
- C. Trigger.old will contain the user entered value of 2.
- D. Trigger.old will contain the initial value of 1.

Answer: B,D

NEW QUESTION: 4

Which two statements are true about 6to4 tunnels? (Choose two.)

- A. In a 6to4 tunnel, the IPv4 address 192.168.99.1 would be converted to the 2002:c0a8:6301::/16 IPv6 address.
- B. In a 6to4 tunnel, the first two bytes of the IPv6 address will be 0x2002 and the next four bytes will be the hexadecimal equivalent of the IPv4 address.
- C. In a 6to4 tunnel, the IPv4 address 192.168.99.1 would be converted to the 2002:1315:4463:1::/64 IPv6 address.
- D. In a 6to4 tunnel, the IPv4 address 192.168.99.1 would be converted to the 2002:c0a8:6301::/48 IPv6 address.
- E. In a 6to4 tunnel, the first two bytes of the IPv6 address will be locally derived and the next two bytes will be the hexadecimal equivalent of the IPv4 address.

Answer: B,D

Explanation:

In a 6to4 tunnel, the first two bytes of the IPv6 address will be 0x2002 and the next four bytes will be the hexadecimal equivalent of the IPv4 address.

The IPv4 address 192.168.99.1 would be converted to the 2002:c0a8:6301::/48 IPv6 address.
