**Answer: D**

**NEW QUESTION: 3**

DRAG DROP

Your development team has created a new solution that is deployed in a virtual network named fabDevVNet. Your testing team wants to begin testing the solution in a second Azure subscription. You need to create a virtual network named fabTestVNet that is identical to fabDevVNet. You want to achieve this goal by using the least amount of administrative effort. Which three steps should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

**Answer:**

Explanation:

Explanation:

Box 1:

Box 2:

Box 3:

\*You can export your network settings to a network configuration file (.xml). You can then use this file as a template to create additional virtual networks, or to recreate your virtual network if you delete it.

\*After you've configured your network configuration file, use the procedure below to import it into the Management Portal.

To import a network configuration file:  
Log on to the Management Portal.  
In the navigation pane on the bottom left, click New.  
Click Network Services-> Virtual Network-> Import  
Configuration.
